

Folding Rule A61

A folding rule made from anodised aluminium with galvanised steel joints. Scale with black figures on both sides, metric along the bottom edge and British imperial along the top edge. Good resistance to moisture, heat and wear.

Features

- Anodised aluminium with galvanised steel joints affords increased protection against corrosion.
- Good resistance to moisture, heat and wear.
- Type approved as per EU Class III.

Scale mm & inch (both sides), Aluminium, Heat resistant
