

# Hacksaw HMS

A standard hacksaw with a steel frame for precision, performance and high blade tension. The Ergonomically shaped handle is made from cast aluminum and complemented with a grip friendly plastic support at the front of the frame to maximize the user friendliness. The blade can be tilted for cutting close to a flat surface without loss of performance and precision. The blade tensioner is spring-loaded to support when changing blades and the ergonomically shape helps when creating the high blade tension. The hacksaw is delivered with Hultafors BI-metal blade (24 TPI) for maximum precision and performance.

## Features

- Steel frame.
- Very high blade tension.
- Ergonomic handle with aluminum grip.
- Spring-loaded blade tensioner.
