

# Square Pro

A Square built for both precision and durability. Excellent for construction, workshops and carpentry work. The blade is 45 mm wide to accommodate work with standard stud dimensions and a center line makes it easy to quickly mark out both sides of a stud. The blade also has scribing notches spaced 5 mm apart, these can be used to draw or cut a line parallel along an edge. A unique assembly technology with strong custom riveting and a 1.5 mm thick high-strength stainless steel blade. That provides an extremely durable design that can withstand tough working environments and will last a long time. A precision cut blade and riveting with minimal tolerances provide extremely high precision; angle tolerance  $\pm 0.03^\circ$  ( $\pm 0.5$  mm/m).

## Features

- The stock has a hole for attaching the tool safety lanyard or for wall hanging.
- Laser etched millimeter graduation with very high contrast and abrasion resistance.
- The stock is made of fully anodized aluminum with a 18 mm thick handle.
- High strength stainless steel blade – 45 mm wide, 1.5 mm thick.
- Made in Europe with full control over working conditions and sustainability.

Tolerance +/-0.03 degrees, Stainless steel, Scribing notches, 45mm blade with centerline
